1. The amendment filed on 9/20/06 has been considered.

Double Patenting Rejection

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Rejection, Obviousness Type Double Patenting

3. Claims 6-25 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 15-20 of U.S. Patent No. 6,984,037 (Bleau). Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 15-20 of U.S. Patent No. 6,984,037 (Bleau) anticipated claims 6-25 of this application.

Claims 15-20 of U.S. Patent No. 6,984,037 (Bleau) claiming eyewear comprising a sealing frame comprising a thin layer of compliant material and having opposed surfaces, an adhesive side; and a lens adapted to cover at least one of the user's eyes, wherein a first portion of the frame is disposed along the perimeter of the lens and a

second portion of the frame extends beyond the perimeter of the lens and is adapted to conform to the shape of a user's face, wherein said frame is disposed along a lower half of the perimeter of said lens, wherein said frame is disposed along an upper half of the perimeter of said lens, wherein said frame comprises a compliant and resiliently defonnable material adapted to conform to the user's face, wherein said frame comprises a flexible, compliant and elastic material and an adhesive material defining said adhesive side of said frame wherein said frame comprises flexible, compliant adhesive material (see claims 15-20).
